

## 中国新高教集团环境管理政策

### 一、 政策使命与适用范围

我们的使命是以学生为中心，在创建「百年大学」的过程中，将绿色发展理念融入教育全链条，最小化校园运营对环境的影响，同时依托教育优势赋能社会低碳发展。

本政策适用于集团及旗下高校的所有校区、部门及业务职能，是集团ESG战略的核心组成部分。

### 二、 核心承诺

#### 1. 合规与责任落地

严格遵守中国及各办学省份的生态环境保护、节能减排等法律法规，将环境责任纳入各院校「一把手」工程。

#### 2. 治理与资源保障

集团董事会统筹监督环境战略实施，为绿色校园建设、低碳技术应用（如智慧能源、污水回用）配备专项资源；各院校设立「绿色校园工作小组」，由校领导牵头推进。

#### 3. 环境绩效提升

对标「绿色校园」「节水型高校」等标准，将再生水回用、智慧能源管理、碳排放监测等融入校园基建与运营；每年设定量化目标（如单位面积能耗下降）并纳入院校考核。

#### 4. 低碳校园建设

推广屋面光伏发电、中水循环系统等成熟技术，逐步实现校园「近零碳」场景试点；优先采购节能设备、环保材料，减少校园碳足迹。

#### 5. 资源高效利用

推进节水、节电、垃圾分类与回收体系建设，重点推广可再生资源循环利用；依托智慧校园平台（如能耗监测系统）实现能源资源精细化管理。

## China New Higher Education Group Environmental Management Policy

### I. POLICY MISSION AND SCOPE OF APPLICATION

Our mission is to adopt a student-oriented approach, integrate the concept of green development into the entire education chain while building universities with a century-long vision, minimize the environmental impact of campus operations, and empower the low-carbon development of society by leveraging our educational advantages.

This Policy applies to all campuses, departments and business functions of the Group and its affiliated institutes and constitutes a core component of the Group's ESG strategy.

### II. CORE COMMITMENTS

#### 1. Compliance and Responsibility Implementation

Strictly comply with the laws and regulations on ecological environmental protection, energy conservation and emission reduction of China and the provinces where the Group operates schools, and integrate environmental responsibility into the "first-in-charge" projects of each university.

#### 2. Governance and Resource Assurance

The Board of Directors of the Group shall oversee the implementation of the environmental strategy as a whole, and allocate special resources for the construction of green campuses and the application of low-carbon technologies (e.g., smart energy, wastewater reuse). Each university shall establish a "Green Campus Task Force" led by leaders of each university to advance related work.

#### 3. Environmental Performance Improvement

Align with standards such as "Green Campus" and "Water-Saving University", integrate reclaimed water reuse, smart energy management and carbon emissions monitoring into the infrastructure and operations of each campus. Set quantitative annual targets (e.g., reduction in energy consumption per unit area) and include them in university performance assessments.

#### 4. Low-Carbon Campus Construction

Promote mature technologies including rooftop photovoltaic power generation and reclaimed water recycling systems, and gradually launch pilot "near-zero carbon" scenarios on campus. Give priority to the procurement of energy-saving equipment and environmentally friendly materials to reduce the carbon footprint of each campus.

#### 5. Efficient Resource Utilization

Promote the development of water conservation, electricity conservation, waste classification and recycling systems, with a focus on the reuse of renewable resources. Realize refined management of energy and resources through the smart campus platforms (e.g., energy consumption monitoring system).

6. **污染与废物管控**
- 规范校园生活垃圾的分类处置，建立废物回收处置管理制度；防控校园餐饮、基建等环节的污染风险，确保排放达标。
7. **多方协同行动**
- 联合合作企业、供应商共同落实绿色采购、低碳合作；与地方政府、行业协会共享绿色校园建设经验（如节能减排案例）。
8. **师生意识培育**
- 开展环境主题培训、校园低碳活动（如节能竞赛），鼓励师生在教学、生活中践行绿色理念。
9. **信息公开与透明**
- 定期发布环境绩效数据（如能耗、减排量），通过集团官网、ESG报告向社会公开；接受利益相关方监督。

### 三、 政策更新

本政策每年审查，将根据国家「双碳」战略、环境技术发展及教育行业趋势进行动态调整。

6. **Pollution and Waste Control**
- Standardize the classified disposal of domestic waste on each campus and establish a waste recycling and disposal management system. Prevent and control pollution risks in campus catering, infrastructure construction and other aspects to ensure that all emissions meet the relevant standards.
7. **Multi-Stakeholder Collaborative Actions**
- Join hands with cooperative enterprises and suppliers to implement green procurement and low-carbon cooperation. Share experience in green campus construction (e.g., energy conservation and emission reduction cases) with local governments and industry associations.
8. **Cultivation of Environmental Awareness Among Teachers and Students**
- Carry out environmental-themed training and campus low-carbon activities (e.g., energy-saving competitions), and encourage teachers and students to practice the green concept in teaching, learning and daily life.
9. **Information Disclosure and Transparency**
- Regularly release environmental performance data (e.g., energy consumption, emission reduction volume) and disclose them to the public through the Group's official website and ESG reports. Accept supervision from stakeholders.

### III. POLICY UPDATE

This Policy shall be reviewed annually and dynamically adjusted in accordance with the "National 'Dual Carbon' Strategy", the development of environmental technologies and trends in the education industry.
